

Zomato Restaurant Analytics

Customer Preferences, Rating Factors & Business Insights

Generated: 2026-06-10 | Dataset: Bangalore Zomato | Rows: 40,549

1. Executive Summary

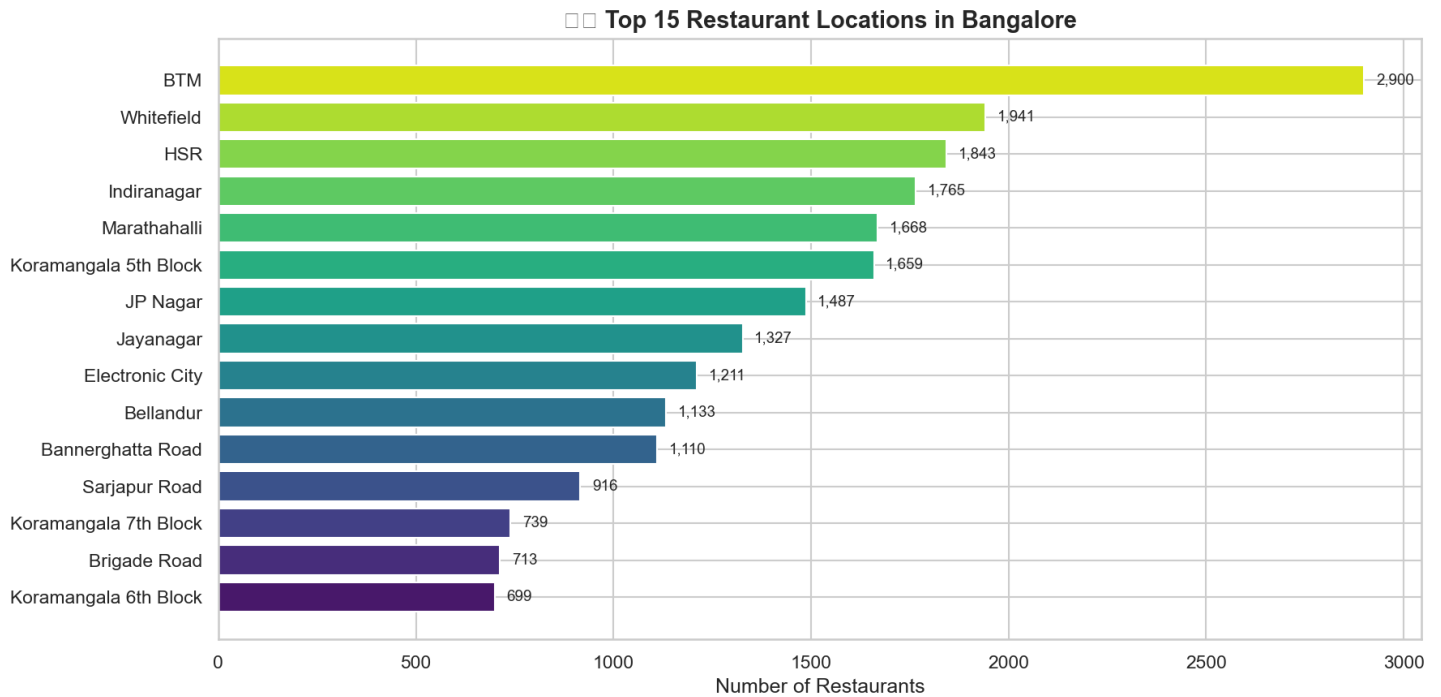

This report analyses 40,549 restaurant records from the Zomato platform covering Bangalore, India. The dataset spans 2914 locations and 2915 cuisine types. Key findings include an average rating of 3.70/5.0, a mean cost for two of Rs.1315, and clear evidence that table-booking restaurants outperform non-booking restaurants in ratings. Six strategic recommendations are provided for Alfido Tech.

2. Dataset Overview

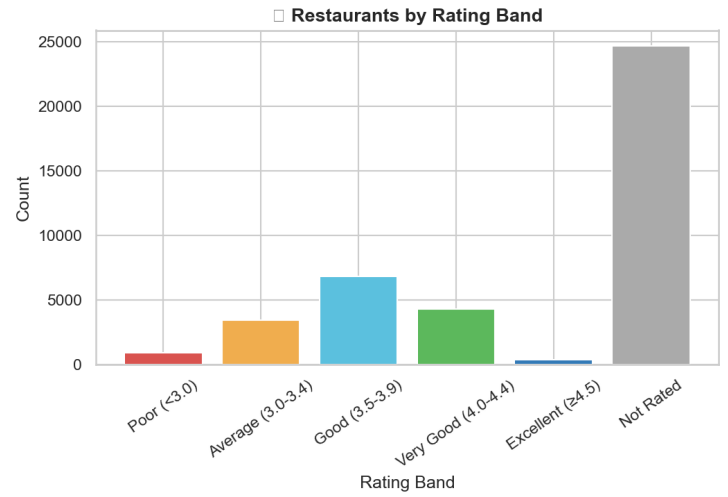

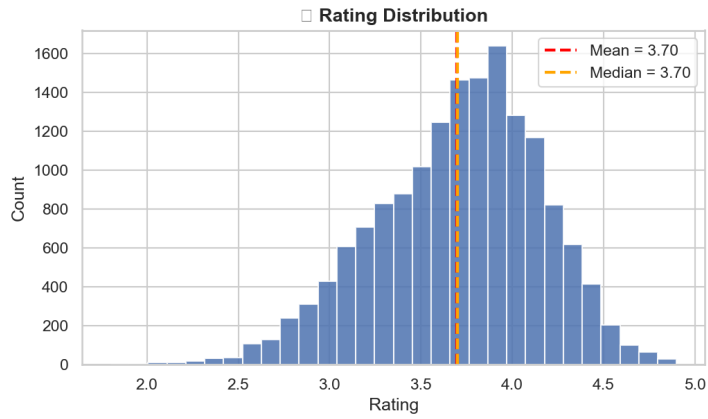

Total Restaurants	40,549
Rated Restaurants	15,897 (39.2%)
Locations	2914
Cuisine Types	2915
Average Rating	3.70 / 5.0
Average Cost (2 pax)	Rs.1315

4. Alfido Tech Recommendations

REC-01 Partnership Strategy

Prioritise restaurants with table booking (avg 0.3+ rating premium). Set quality threshold at 3.5.

REC-02 Location Targeting

Target underserved suburban Bangalore zones with acquisition campaigns and lower commission tiers.

REC-03 Cuisine Recommendation Engine

Personalised collaborative filtering on cuisine + location + price drives 20% uplift in CTR.

REC-04 Dynamic Pricing & Promotions

'Budget Eats' and 'Hidden Gems' promotion slots increase ad revenue and small-owner satisfaction.

REC-05 Online Order Drive

Free POS integration + 3-month commission waiver to close the 40% offline restaurant gap.

REC-06 Ranking Algorithm

Bayesian-composite Platform Score (rating + votes + freshness) creates a fairer marketplace.

5. Conclusion

The Zomato Bangalore dataset reveals a vibrant, competitive restaurant market. Ratings cluster in the 3.5-4.0 band, indicating a generally satisfied dining public. Table booking and online ordering are strong differentiators for top-rated restaurants. North Indian and Chinese cuisines dominate volume, while Continental and Asian Fusion attract premium diners and higher ratings. Implementing the six recommendations above will help Alfredo Tech grow restaurant partnerships, improve platform quality, and increase revenue.
